ASTRA DISP 11306

Dispersant

Description

ASTRA DISP 11306 is a kind of polymer dispersant, that is widely used in solvent borne coatings and 100% systems. It is suitable for carbon black and organic pigments. It shows excellent grinding and dispersing effect, great versatility and great viscosity reduction effect.

Physical and Chemical properties

Ingredient: Copolymer with pigment affinity group
Appearance: Yellow viscous liquid
Active part: 100%

Speciality

1. ASTRA DISP 11306 is suitable for dispersion of organic pigments and carbon black pigments that are difficult ti disperse in solvent-borne coating systems.
2. ASTRA DISP 11306 is compatible with various common resins.
3. ASTRA DISP 11306 is suitable for the preparation of pigment concentrates.

Application System and Dosage

ASTRA DISP 11306 is recommended for solvent-borne industrial and high-end coating systems, especially epoxy systems, unsaturated resins, and printing inks.

Usually, it should be charged (recommendations for 100% active dispersant) before the grinding stage during the manufacture with 7 - 15% dosage upon organic pigments, 10 - 20% dosage upon low surface carbon black and 40 - 80% upon high surface carbon black.

Package

25 kg, 200 kg.
