ASTRA PA 1908

Adhesion promoter

Description

ASTRA PA 1908 can sigmificantly promote the adhesion of the paint film to the substrate. It is mainly used for non-ferrous metals and some low-grade plastics (PET, PP, ABS, etc.). ASTRA PA 1908 has good compatibility with resins, does not affect storage stability, color changing or weather resistance. It is suitable for aluminium substrates, galvanized and various steel alloys.

Physical and Chemical properties

Ingredient: Modified polyester compound
Appearance: Colorless, viscous transparent liquid
Active part: 70%

Speciality

1. ASTRA PA 1908 for non-ferrous metals and some low-grade plastics.
2. ASTRA PA 1908 does not affect storage stability, color changing or weather resistance.

Application System and Dosage

ASTRA PA 1908 could be used in various industrial coating systems for metal substrates.

Usually, it could be charged at a random stage during the manufacture with 1% - 3% dosage upon total formulation.

Package

25kg metal pail.
