

ASTRA DF 1704

Silicone defoamer

Description

ASTRA DF 1704 is a organosilicone emulsion used as a defoamer for water-borne systems. It prevents foam well at low concentrations. It is easy to disperse and it has low tendency to cause craters.

Physical and Chemical properties

Ingredient: Modified polysiloxane

Appearance: White emulsion

Active part: 20%

Solvent: Water

Specialty

1. ASTRA DF 1704 defoamer is suitable for water-borne coating systems.
2. ASTRA DF 1704 has good foam prevention at low concentrations.
3. ASTRA DF 1704 has low tendency to cause craters.

Application System and Dosage

ASTRA DF 1704 could be used in all water-borne systems.

Usually, the additive should be introduced at the dispersing stage during the manufacture with 0.05% to 1.0% dosage upon total formulation.

Package

25kg metal pail.
