

ASTRA DF 2104

Silicone defoamer

Description

ASTRA DF 2104 is a organosilicone defoamer for water-borne systems. It has strong defoaming properties at low concentrations. It should be introduced at a grinding stage.

Physical and Chemical properties

Ingredient: Modified polysiloxane

Appearance: Light yellow transparent liquid

Active part: 100%

Specialty

1. ASTRA DF 2104 defoamer is suitable for water-borne and middle or even high polarity solvent-borne coating systems, it has high defoaming speed.
2. ASTRA DF 2104 defoamer has highly efficient defoaming properties at the rather low concentrations.

Application System and Dosage

The recommended dosage of the additive is 0.1% to 1% upon total formulation.

Package

25kg metal pail.
