

ASTRA DF 2204

Silicone defoamer

Description

ASTRA DF 2204 is an organosilicone emulsion used as a defoamer for water-borne systems. It prevents foam formation well even at low concentrations. It is easy to disperse and it has low tendency to cause craters.

Physical and Chemical properties

Ingredient: Modified polysiloxane

Appearance: White emulsion

Active part: 20%

Solvent: Water

Specialty

1. ASTRA DF 2204 defoamer is suitable for water-borne coating systems.
2. ASTRA DF 2204 prevents foam formation well even at low concentrations.
3. ASTRA DF 2204 has low tendency to cause craters.

Application System and Dosage

ASTRA DF 2204 is recommended for water-borne coating systems.

Usually, the additive should be introduced at the dispersion stage during the manufacture with 0.05% to 1.0% dosage upon total formulation.

Package

25kg plastic pail.
