

## ASTRA DF 504

---

Silicone defoamer

### Description

ASTRA DF 504 is fluorine modified organosilicone anti-foam agent. It has very good air release properties and foam-destroying ability. Therefore, it can decrease the amount of bubbles greatly both at the production stage and at the application stage. ASTRA DF 504 has excellent compatibility.

### Physical and Chemical properties

**Ingredient:** Fluorine modified organosilicone compound

**Appearance:** Colorless transparent liquid

**Active part:** 1%

**Solvent:** Isooctyl acetate, ethylene glycol diacetate

### Specialty

1. ASTRA DF 504 is suitable for solvent-borne coating systems and has excellent air release properties and foam-destroying ability.
2. ASTRA DF 504 has very good compatibility. In various application systems it has no influence on the transparency of the film.
3. ASTRA DF 504 is suitable for comprehensive applications and can be used in various coating systems.

### Application System and Dosage

ASTRA DF 504 is suitable for all solvent-borne systems.

Usually, it is possible to introduce the additive at a random stage during the manufacture with 0.1% to 1% dosage upon total formulation.

### Package

25kg metal pail.
