

ASTRA DISP 4606

Dispersant

Description

ASTRA DISP 4606 is a polymer dispersant particularly suitable for inorganic pigments. It could rapidly decrease the viscosity with low foam stabilization. ASTRA DISP 4606 could increase the gloss of the coating.

Physical and Chemical properties

Ingredient: Copolymer with unique pigment affinity groups

Appearance: Light yellow transparent liquid

Active part: 40%

Solvent: Water

Speciality

1. ASTRA DISP 4606 is suitable for inorganic pigments dispersion in water-borne coating systems.
2. ASTRA DISP 4606 is a polymer dispersant, it provides low foaming in the system.

Application System and Dosage

ASTRA DISP 4606 is recommended for water-borne coating systems.

Usually, the additive should be introduced before the grinding stage during the manufacture with 1 - 5% dosage upon inorganic pigments.

Package

25kg metal pail.
