

## ASTRA DISP 6206

---

Dispersant

### Description

ASTRA DISP 6206 is a polymer dispersant suitable for dispersion of organic pigments in water-borne systems. It could decrease the viscosity significantly, provide low foaming and increase the gloss of the coating.

### Physical and Chemical properties

**Ingredient:** Copolymer with pigment affinity groups

**Appearance:** Yellow transparent liquid

**Active part:** 100%

### Specialty

1. ASTRA DISP 6206 is suitable for dispersion of organic pigments and carbon black pigment in water-borne systems.
2. ASTRA DISP 6206 could decrease the viscosity in the millbase and shorten the dispersion time.

### Application System and Dosage

ASTRA DISP 6206 is recommended for water-borne coating systems.

Usually, it is recommended to introduce the additive before the dispersion stage during the manufacture with 10% to 30% dosage upon organic pigments and with 30% to 80% dosage upon carbon black.

### Package

**25kg** metal pail.
