

ASTRA LA 1305NS

Non-silicone leveling agent

Description

ASTRA LA 1305NS is a fluorocarbon modified acrylic copolymer. It is used as a leveling agent with high fluoro content. ASTRA LA 1305NS has excellent leveling performance, high leveling speed and good compatibility with most of common resins. It can greatly decrease the surface tension with good anti-crater performance.

Physical and Chemical properties

Ingredient: Fluorinated acrylic copolymer

Appearance: Light yellow transparent liquid

Active part: 100%

Specialty

1. ASTRA LA 1305NS has good compatibility and leveling in solvent-borne system.
2. ASTRA LA 1305NS can decrease the surface tension of the system and improve the substrate wetting.

Application System and Dosage

ASTRA LA 1305NS is recommended for solvent-borne and solvent-free systems such as alkyd, acrylic acid, amino baking systems and others.

The recommended dosage of the additive is 0.1 - 1% upon total formulation.

Package

25kg pail.
