

## ASTRA LA 801

Silicone leveling agent

### Description

ASTRA LA 801 is a solution of a organomodified polysiloxane with high molecular weight. It provides good leveling and efficiently prevents foam formation. It provides to the coating mar resistance and improves performance of the coating. ASTRA LA 801 is suitable for systems exposed to high temperature. Due to high compatibility of the additive it is suitable for clear systems.

### Physical and Chemical properties

**Ingredient:** Organomodified polysiloxane

**Appearance:** Light yellow viscous transparent liquid

**Active part:** 100%

### Specialty

Leveling	Wetting	Recoatibility	Compatibility	Sliding	Low Foam Stabilization	Anti-craters	Anti-blocking
●●●●●	●●●●	●●●●●	●●●	●●●●●	●●●●	●●●●●	●●●●

●●●●● Good ● Bad

### Application System and Dosage

ASTRA LA 801 is suitable for solvent-borne and UV curable coating systems.

Usually, it is possible to introduce the additive at a random stage during the manufacture with 0.1% to 1% dosage upon total formulation.

### Package

25kg metal pail.
