

ASTRA PA 1408

Adhesion promoter

Description

ASTRA PA 1408 is an adhesion promoter based on a linear polyester with active hydrogen atoms. It is suitable for self-drying solvent-borne coating systems. ASTRA PA 1408 has good compatibility with most of common resins and could improve the adhesion of the coating to the metal substrate.

Physical and Chemical properties

Ingredient: Special polyester

Appearance: Colorless viscous transparent liquid

Active part: 60%

Solvent: Diester mixture

Speciality

1. ASTRA PA 1408 adhesion promoter is suitable solvent-borne self-drying coating systems for metal substrates.
2. ASTRA PA 1408 is a linear polyester with active hydrogen atoms that could inhibit the aluminum powder to occur black.
3. ASTRA PA 1408 has good compatibility with thermoplastic resins.

Application System and Dosage

ASTRA PA 1408 is recommended for self-drying resin coating systems.

Usually, it could be charged at a random stage during the manufacture with 0.1% to 5% dosage upon total formulation.

Package

25kg metal pail.
