

ASTRA REACT 1402

Reactive silicone

Description

ASTRA REACT 1402 is an organosilicone compound with single terminal acrylic group. This additive has high purity. It could be used in the synthesis of acrylic resins as a silicone monomer in order to introduce the silicone chain into the acrylic resin.

Physical and Chemical properties

Ingredient: Mono(acrylate) terminated polysiloxane (Mn ≈ 4600)

Appearance: Yellow transparent liquid

Active part: 100%

Application System and Dosage

ASTRA REACT 1402 could be used in the synthesis of acrylic resins as a silicone monomer in order to introduce the silicone chain into the acrylic resin.

The recommended dosage of the additive is around 1%-30% according to the application.

Package

25kg metal pail.
