

ASTRA WA 2003

Wetting agent

Description

ASTRA WA 2003 is a polyether modified organosilicone compound. It could significantly decrease the surface tension of the system and provide strong wetting of the substrate without negative influence on the recoatability. It is an excellent substrate wetting agent that provides leveling and anti-foam ability.

Physical and Chemical properties

Ingredient: Polyether modified polysiloxane

Appearance: Light yellow transparent liquid

Active content: 100%

Speciality

Leveling	Wetting	Recoatability	Compatibility	Sliding	Low Foam Stabilization	Anti-craters	Anti-blocking

Application System and Dosage

ASTRA WA 2003 is suitable for water-borne systems such as wood paints and lacquers, industrial water-borne coatings and UV curable coating systems, printing inks.

The recommended dosage of the additive is around 0.1 - 1% upon total formulation. It could be introduced at a random stage during the manufacture.

Package

25kg metal pail.
