

ASTRA WA 203

Wetting agent

Description

ASTRA WA 203 is a special modified gemini surfactant. It is suitable for water-borne systems for good substrate wetting with a certain defoaming properties. It could decrease both dynamic and static surface tension.

Physical and Chemical properties

Ingredient: Special gemini surfactant
Appearance: Light yellow transparent liquid
Active content: 100%

Speciality

1. ASTRA WA 203 is a modified gemini surfactant.
2. ASTRA WA 203 could decrease both dynamic and static surface tension.

Application System and Dosage

ASTRA WA 203 is recommended to use in the water borne systems.

The recommended dosage of the additive is around 0.1 - 1% upon total formulation. It could be introduced at a random stage during the manufacture.

Package

25kg metal pail.
